## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-22,27-29, drawn to audio signal bandwidth compression, classified in class 704, subclass 500.
  - II. Claims 23-26, drawn to evaluating hearing samples using a correlation function, classified in class 704, subclass 216.
  
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, one pertaining to an audio compression technique, classified in class 704, subclass 500; and the other invention, pertaining to the use of a correlation technique to evaluate hearing samples, classified in 704, subclass 216, have different modes of operation.

Art Unit: 2645

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Ms. Ellen Tao on November 14, 2001 for notification of the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
